

Supplemental EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Thomas H. Ham on April, 22, 2009.

The application has been amended as follows:

A correction has been made to show claims 14, 22 and 25 are depended to claim 1, therefore the only changes to the notice of allowance dated 4/6/2009 are as follows:

On page 4 claim 14 line 1 amended to read "The apparatus as set forth in claim [10] 1, the receiving"

On page 6 claim 22 line 1 amended to read "The apparatus as set forth in claim [10] 1, the receiving"

On page 7 claim 25 line 1 amended to read "The apparatus as set forth in claim [10] 1, the receiving"

On page 9 line 22 last paragraph amended to read "In regards to the analysis of claims [1-11], 1-9, 13-30 in view of 35USC 101, the ..."

On page 2 line 4 amended to read "claims [1-11], 1-9, 13-30 are allowed. Claims 10-12 are cancelled."

For those reasons the Examiner prepared a Supplemental Examiner's amendment to correct the miss-typed areas. The Examiner's statements of reasons for allowance in previous notice (dated 4/6/2009) of Allowance are the same.

Claims 14, 22 and 25 are amended as shown in the following listing of claims.

Claim 14. (currently amended) The apparatus as set forth in claim [10] 1, the receiving means including: a means for generating a plurality of sub-fields associated with a frame of the received video data, wherein each sub-field includes sub-field video data associated with the received video data; and a means for writing the sub-field video data for the plurality of sub-fields to the storing means.

Claim 22. (currently amended) The apparatus as set forth in claim [10] 1, the receiving means including: a means for generating a plurality of R separation sub-fields associated with a frame of the R separation video data, wherein each R separation sub-field includes R separation sub-field video data associated with the R separation video data; a means for generating a plurality of G separation sub-fields associated with a frame of the G separation video data, wherein each G separation sub-field includes G separation sub-field video data associated with the G separation video data; a means for generating a plurality of B separation sub-fields associated with a frame of the B separation video data, wherein each B separation sub-field includes B separation sub-field video data associated with the B separation video data; and a means for writing the R separation sub-field video data for the plurality of R separation sub-fields, the G separation sub-field video data for the plurality of G separation sub-fields, and the B separation sub-field video data for the plurality of B separation sub-fields to the storing means.

Claim 25. (currently amended) The apparatus as set forth in claim [10] 1, the receiving means including: a means for identifying an operational configuration for the receiving means based on a selected display.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JAVID A. AMINI whose telephone number is (571)272-7654. The examiner can normally be reached on 8-4pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kee Tung can be reached on 571-272-7794. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
